

Focus on growing your business, not trying to reconcile conflicting data from incompatible software applications

Best Solution for Solar Installers

Easily customizable dashboards for every department and user provide **real-time, at-a-glance overview** of company operations. Solar-specific project workflows, task queues, pipelines, KPIs, alerts, and more. **Powerful team collaboration and chat**, including with partners, vendors and customers. Plus create and **assign a task from within chat**.

Easy **drag and drop** Document Manager for multi-format file uploads, with **revision and status control**, that automatically trigger AR and AP **transactions** on Milestone Completion. Fast and easy project setup, with progress and sub-contractor task monitoring, **visual timelines**, on-record chat, and multiple built-for-solar financial templates.

3rd Party integrations enhance **operational efficiency**; add-on options include field service automation, distributor integration, dialers, e-signatures, **energy production monitoring**, AWS storage, **warehouse management**, custom training tools and content, payments, weather forecasting, lead generation and more.
