IPSUN
SUNVOY

- For solar installers by solar installers -

One app is all you need for customer project tracking and system monitoring.

- Your own customer portal with your branding
- Manage your solar fleet across multiple inverter brands
- Automated Performance Guarantee management

An easy, at-a-glance view for customers in the construction phase:

- Your own process laid out in a clear, simple format
- Contact info for customer's project manager and sales rep
- Clear graphic depicting all components and overall estimated cost savings of customer's system.

After PTO, your custom branded app will automatically convert to show energy production and so much more:

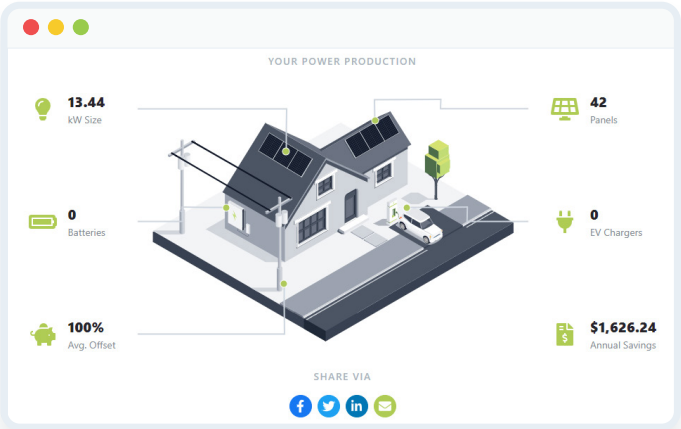

- Easy to view graphic of daily production and production over time. Integrates with any inverter brand.
- Customer documents all in one spot, including initial proposal, change orders, signed agreements, and permitted plan set.
- Service portal allows customers to open a maintenance ticket or ask a billing question directly through the app.
- Ambassador portal makes reviews easier and gives customers a personal referral code to share with friends and family.

IPSUN
SUNVOY

The same app you've already been using to track your project can now be used to track your solar energy production!

CUSTOMER PORTAL APP

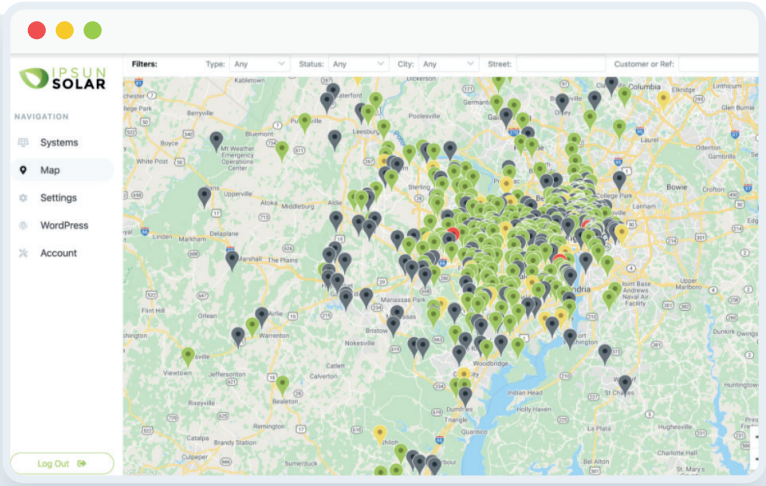

FLEET MANAGEMENT APP

Filter on “Open Tickets”, Monitoring issues, or find projects close to where a crew is working that day.

A sales person may look at closeby projects to inform a potential customer to drive by and check out a system.

DESKTOP APP

Ipsun Sunvoy is the missing piece of software we wished existed years ago and that now powers dozens of solar installers with tens of thousands of systems and end customers.
